WORK EXPERIENCE

System Administrator | System Engineer | 2022 - Now
PT. Indomarco Prismatama - Indomaret Group

- Administered, configured, and deployed Windows and Linux servers along with enterprise NetApp storage systems, alignment with user requirements and operational standards.
- Developed technical planning and architecture design for large-scale IT projects, including server/storage hardware refresh (Tech Refresh) and infrastructure deployment for new Indomaret Group branch expansions.
- Designed and implemented enterprise storage solutions utilizing Data Center and Disaster Recovery Center (DC-DRC) architecture concepts to ensure high availability and data resiliency.
- Maintained enterprise-wide monitoring and performance analysis for over 500+ server and storage devices utilizing monitoring tools (PRTG, Dell OME, NetApp AIQUM) to achieve maximum uptime.
- Managed vendor coordination, technical support escalation, and hardware replacement procedures for critical server and storage equipment failures.
- Collaborated with cross-functional IT teams within Indomaret Group to streamline infrastructure deployment, system upgrades, and standard operating procedures (SOP).

ACADEMIC HISTORY

Telkom University | 2017-2021
Associate's Degree Technology Computer

- GPA: 3.16

TECHNICAL EXPERTISE

- **Storage Management :** NetApp ONTAP, Volume Provisioning, SAN/NAS Protocols (NFS, CIFS, iSCSI), Data Protection & Storage Architecture.
- **Operating Systems:** Linux (Ubuntu, Oracle Linux, Red Hat Enterprise Linux / RHEL), Windows Server.
- **Virtualization :** VMware ESXi, Proxmox VE.
- **Monitoring & Management Tools :** NetApp Active IQ Unified Manager (AIQUM), PRTG Network Monitor, Dell OpenManage Enterprise (OME).
